

Satellite Radio is the best thing that I have found that is providing a huge variety that is not found anywhere else, the enjoyment that Satellite Radio provides is undescrivable. The quality is excellent and greatly appreciated! As citizens paying for this service, I do not feel it is up to NAB to decide what I can listen to and when. The traffic and weather channels provided by Satellite Radio are outstanding. I urge you to reject NAB's petition 04-160. Why destroy a good thing that was a long time coming. Thanks Satellite Radio for a wonderful listening opportunity!
